

CAMARENA HEALTH
INTRANET

SHAREPOINT DEVELOPMENT

NIFTIT delivers SharePoint implementations for non-profits; from highly advanced integrations, business forms and workflow solutions, to customized SharePoint apps and cloud migrations, we can do it all.

BRANDED SHAREPOINT
SITE

NIFTIT Creative created a bespoke front-end template that is aligned to the Camarena Health company branding. Navigation menus, announcement widgets and calendar devices all respect organizational use of color, typography and layout.

SHAREPOINT
FUNCTIONALITY

A variety of SharePoint functionalities were customized to deliver the client a suite of tools, including in-depth searching, system monitoring services and custom document libraries.

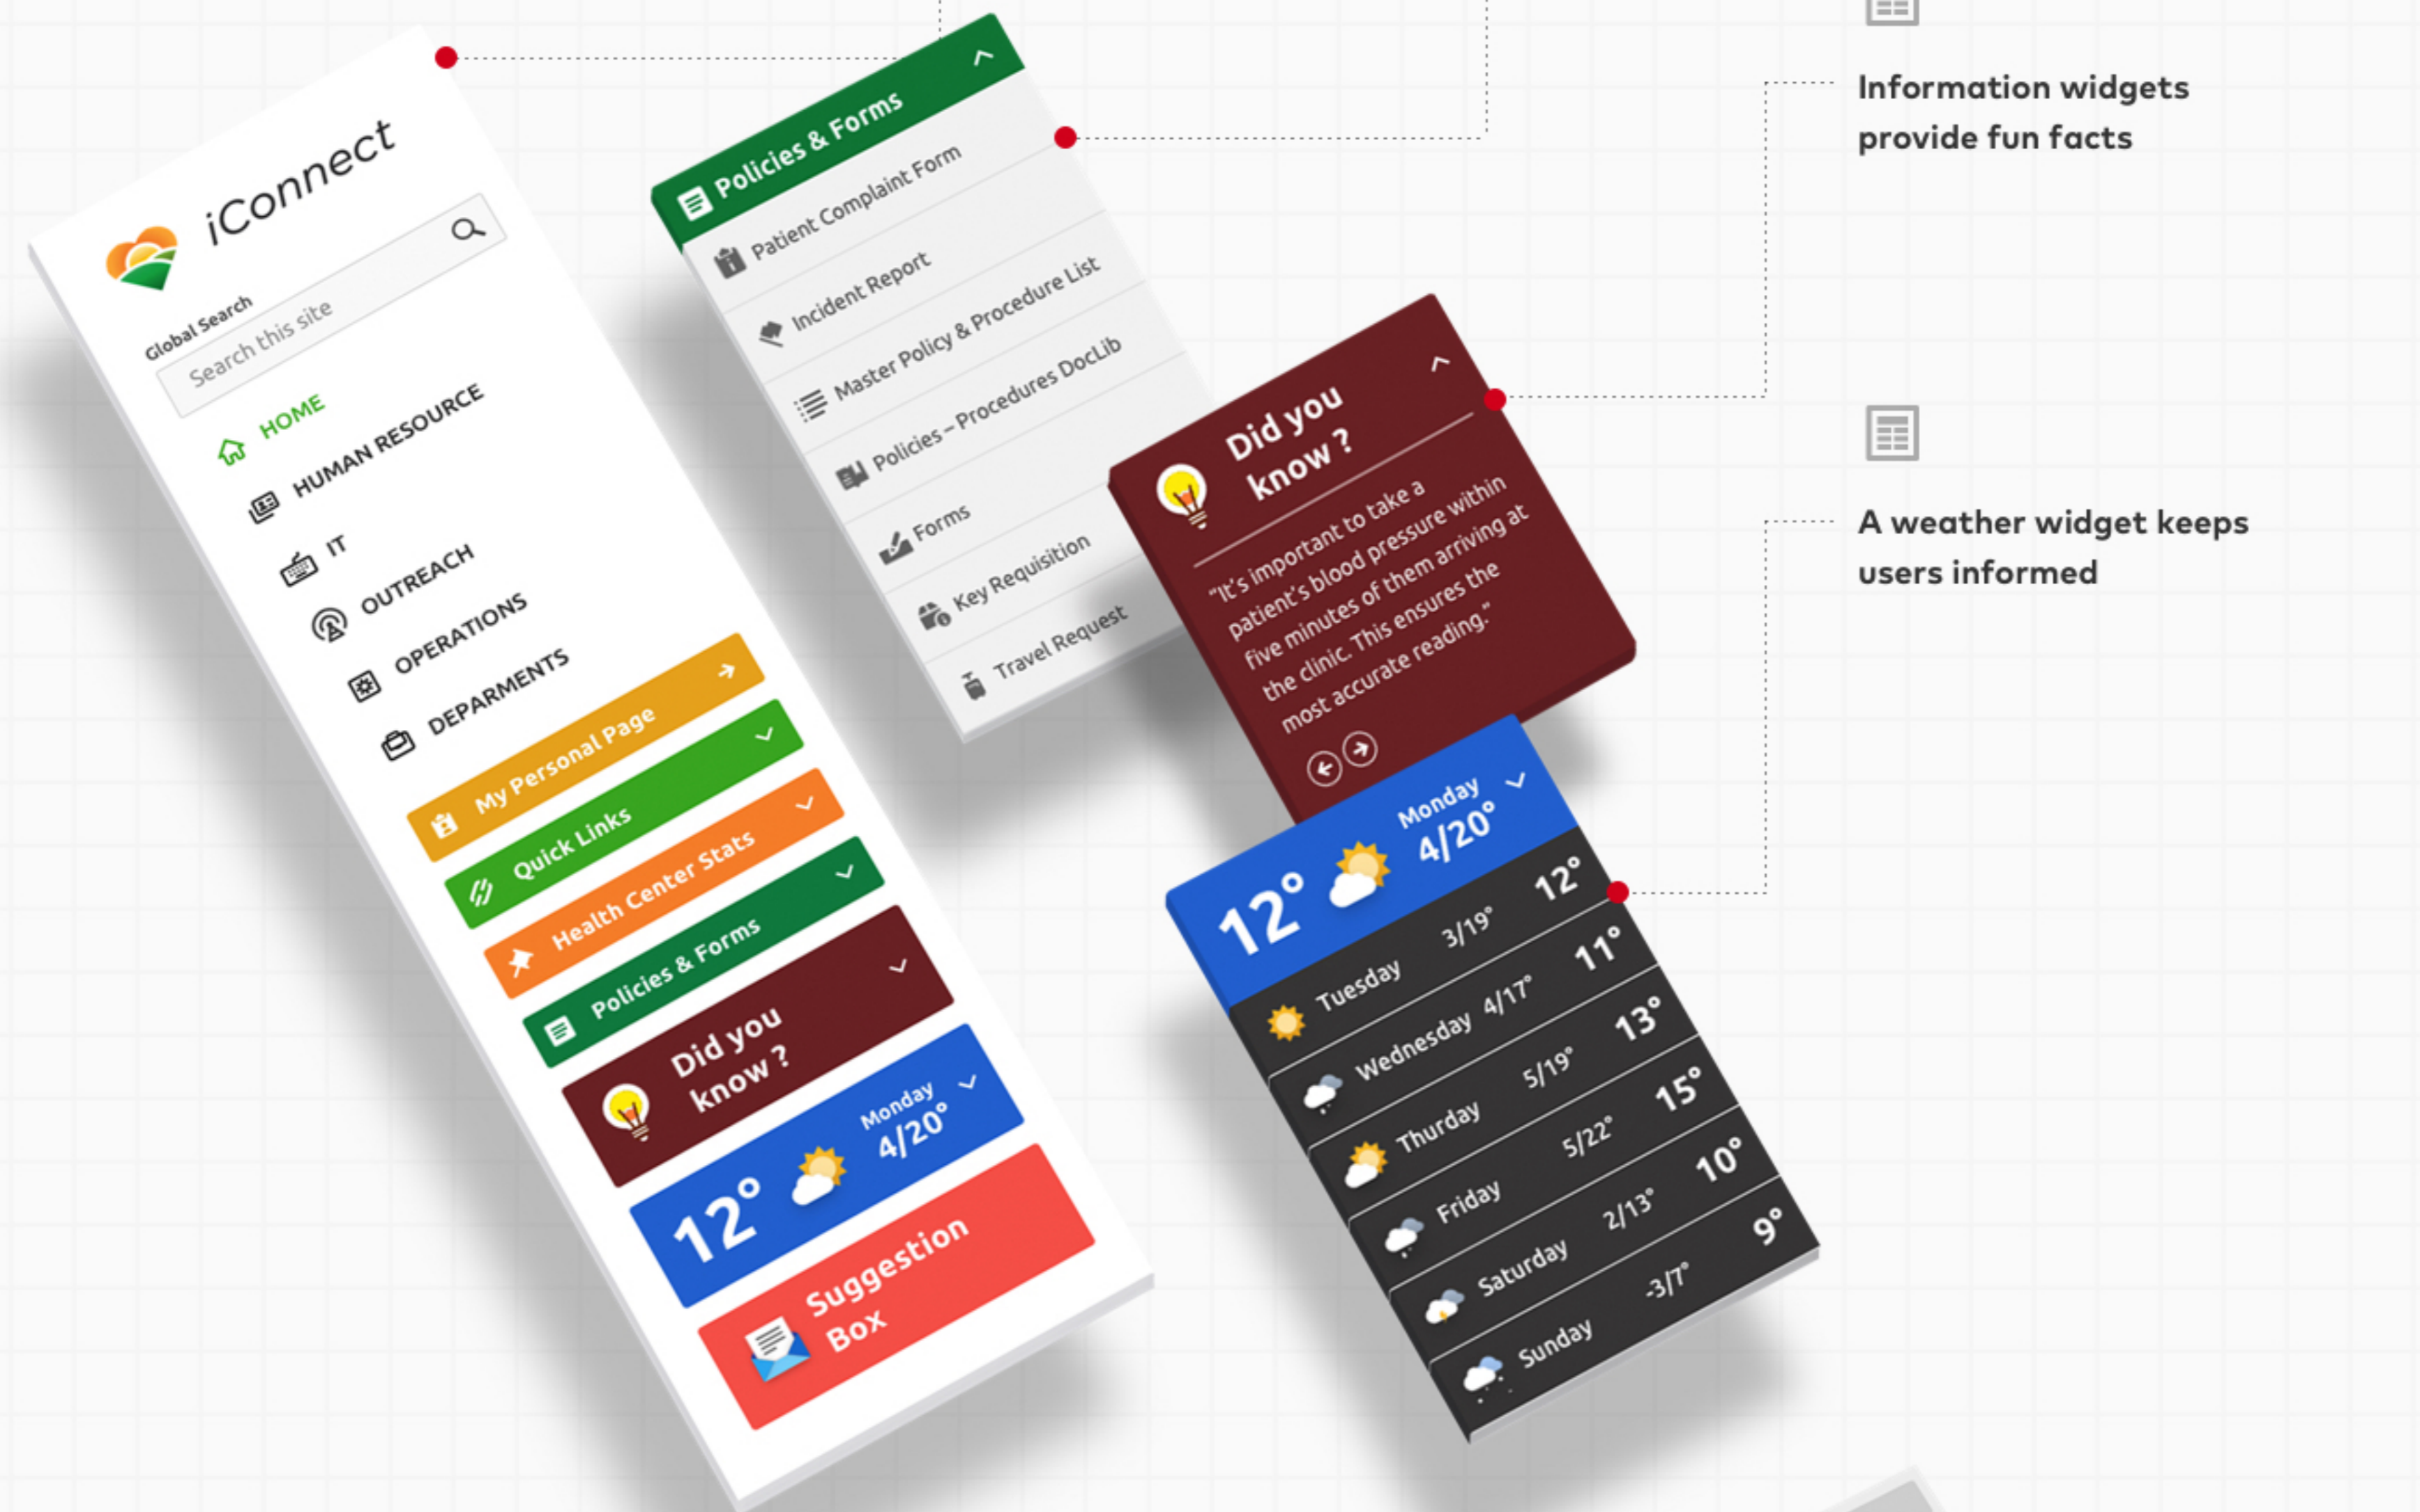

TEAM HUB

Departments within Camarena Health have their own individually-focused portals to allow for easier communication, document sharing and additional customized functionality.

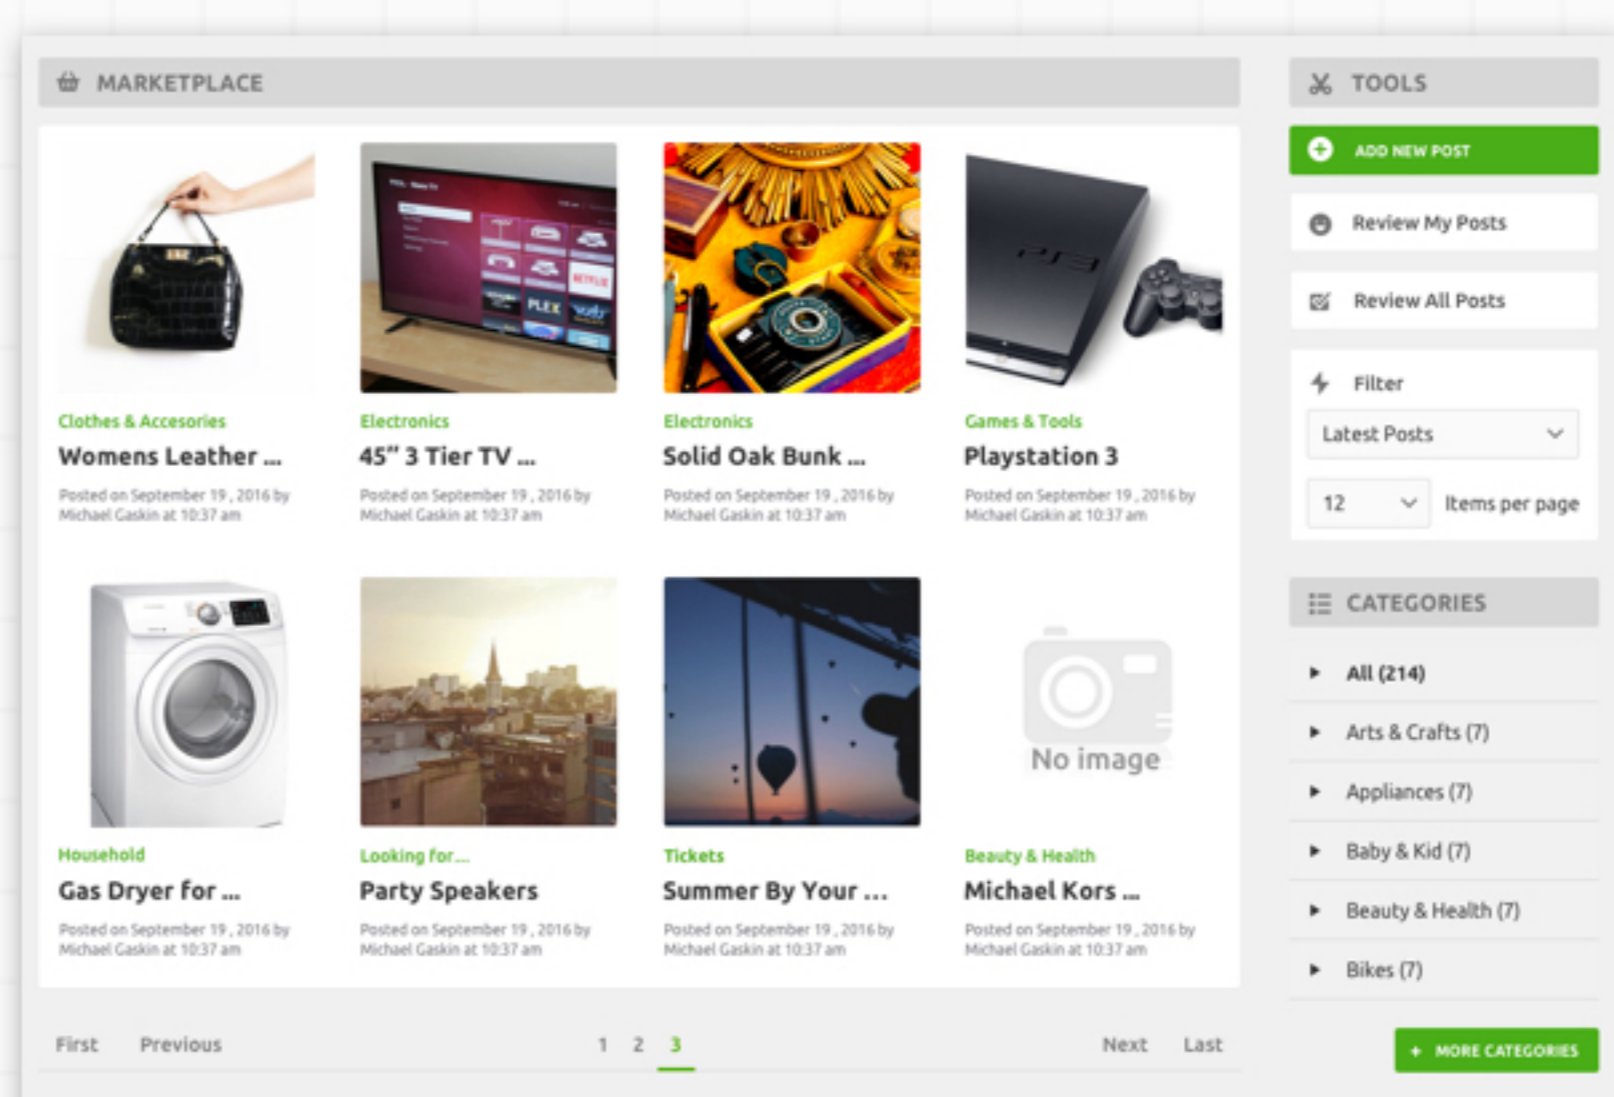

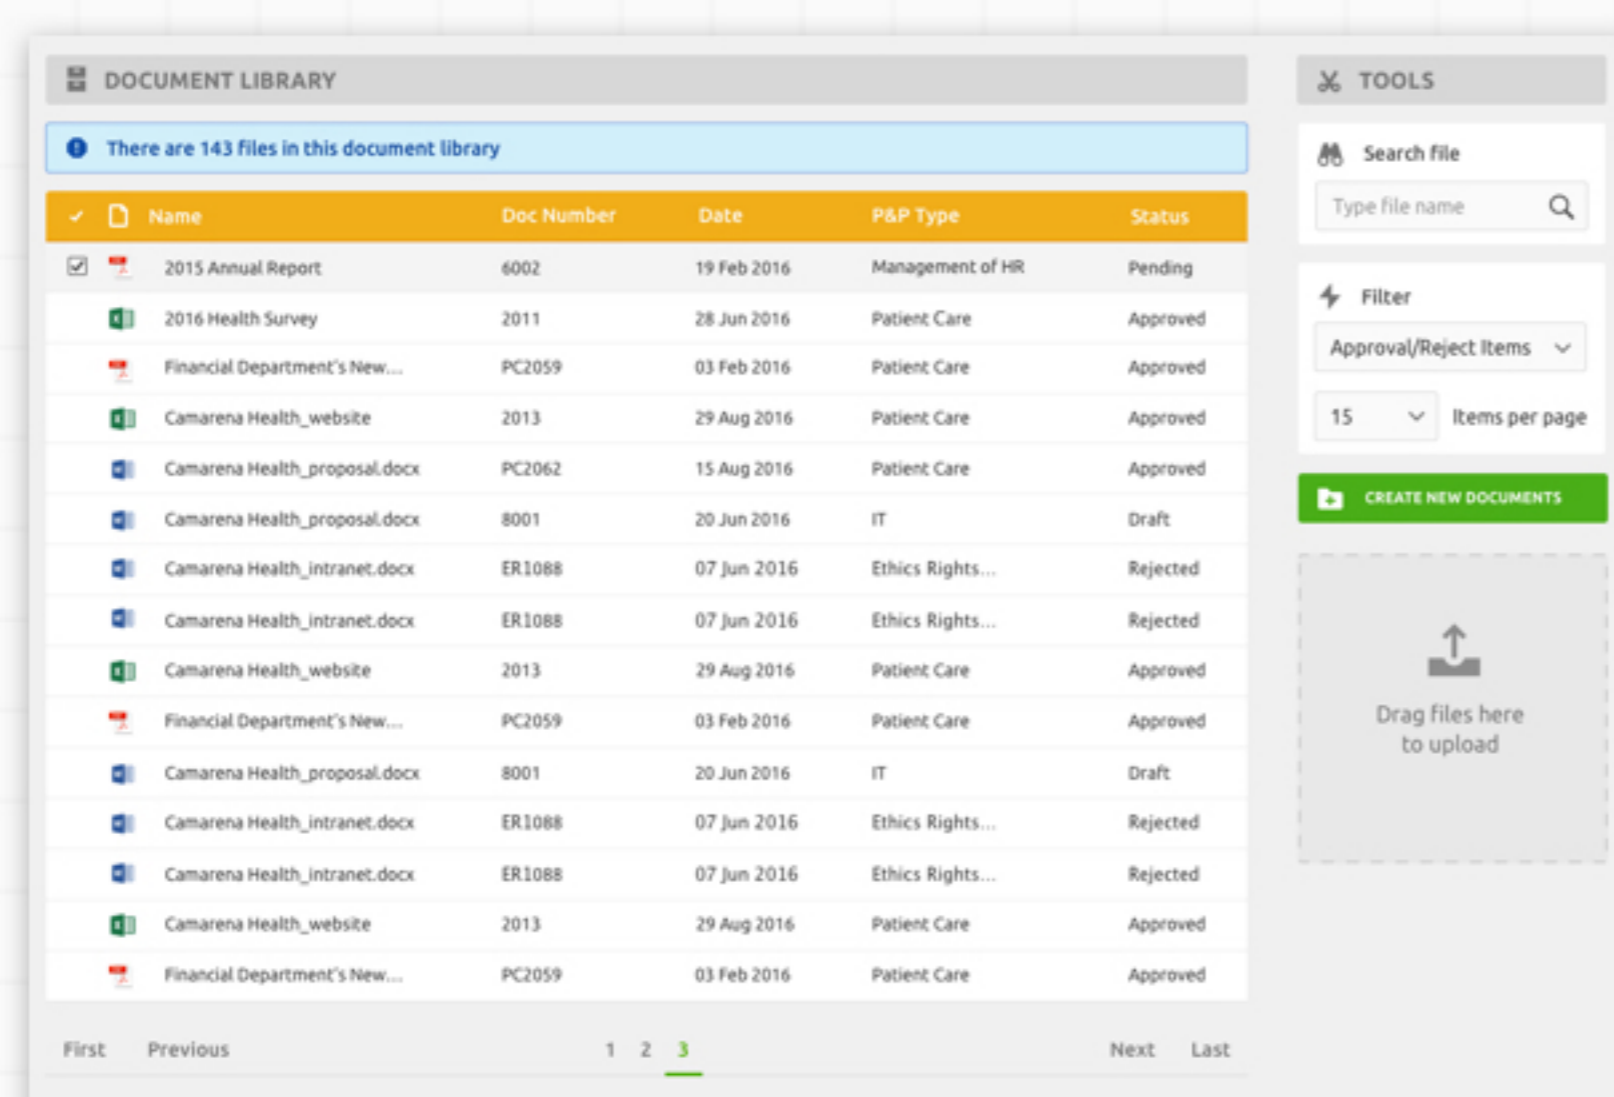

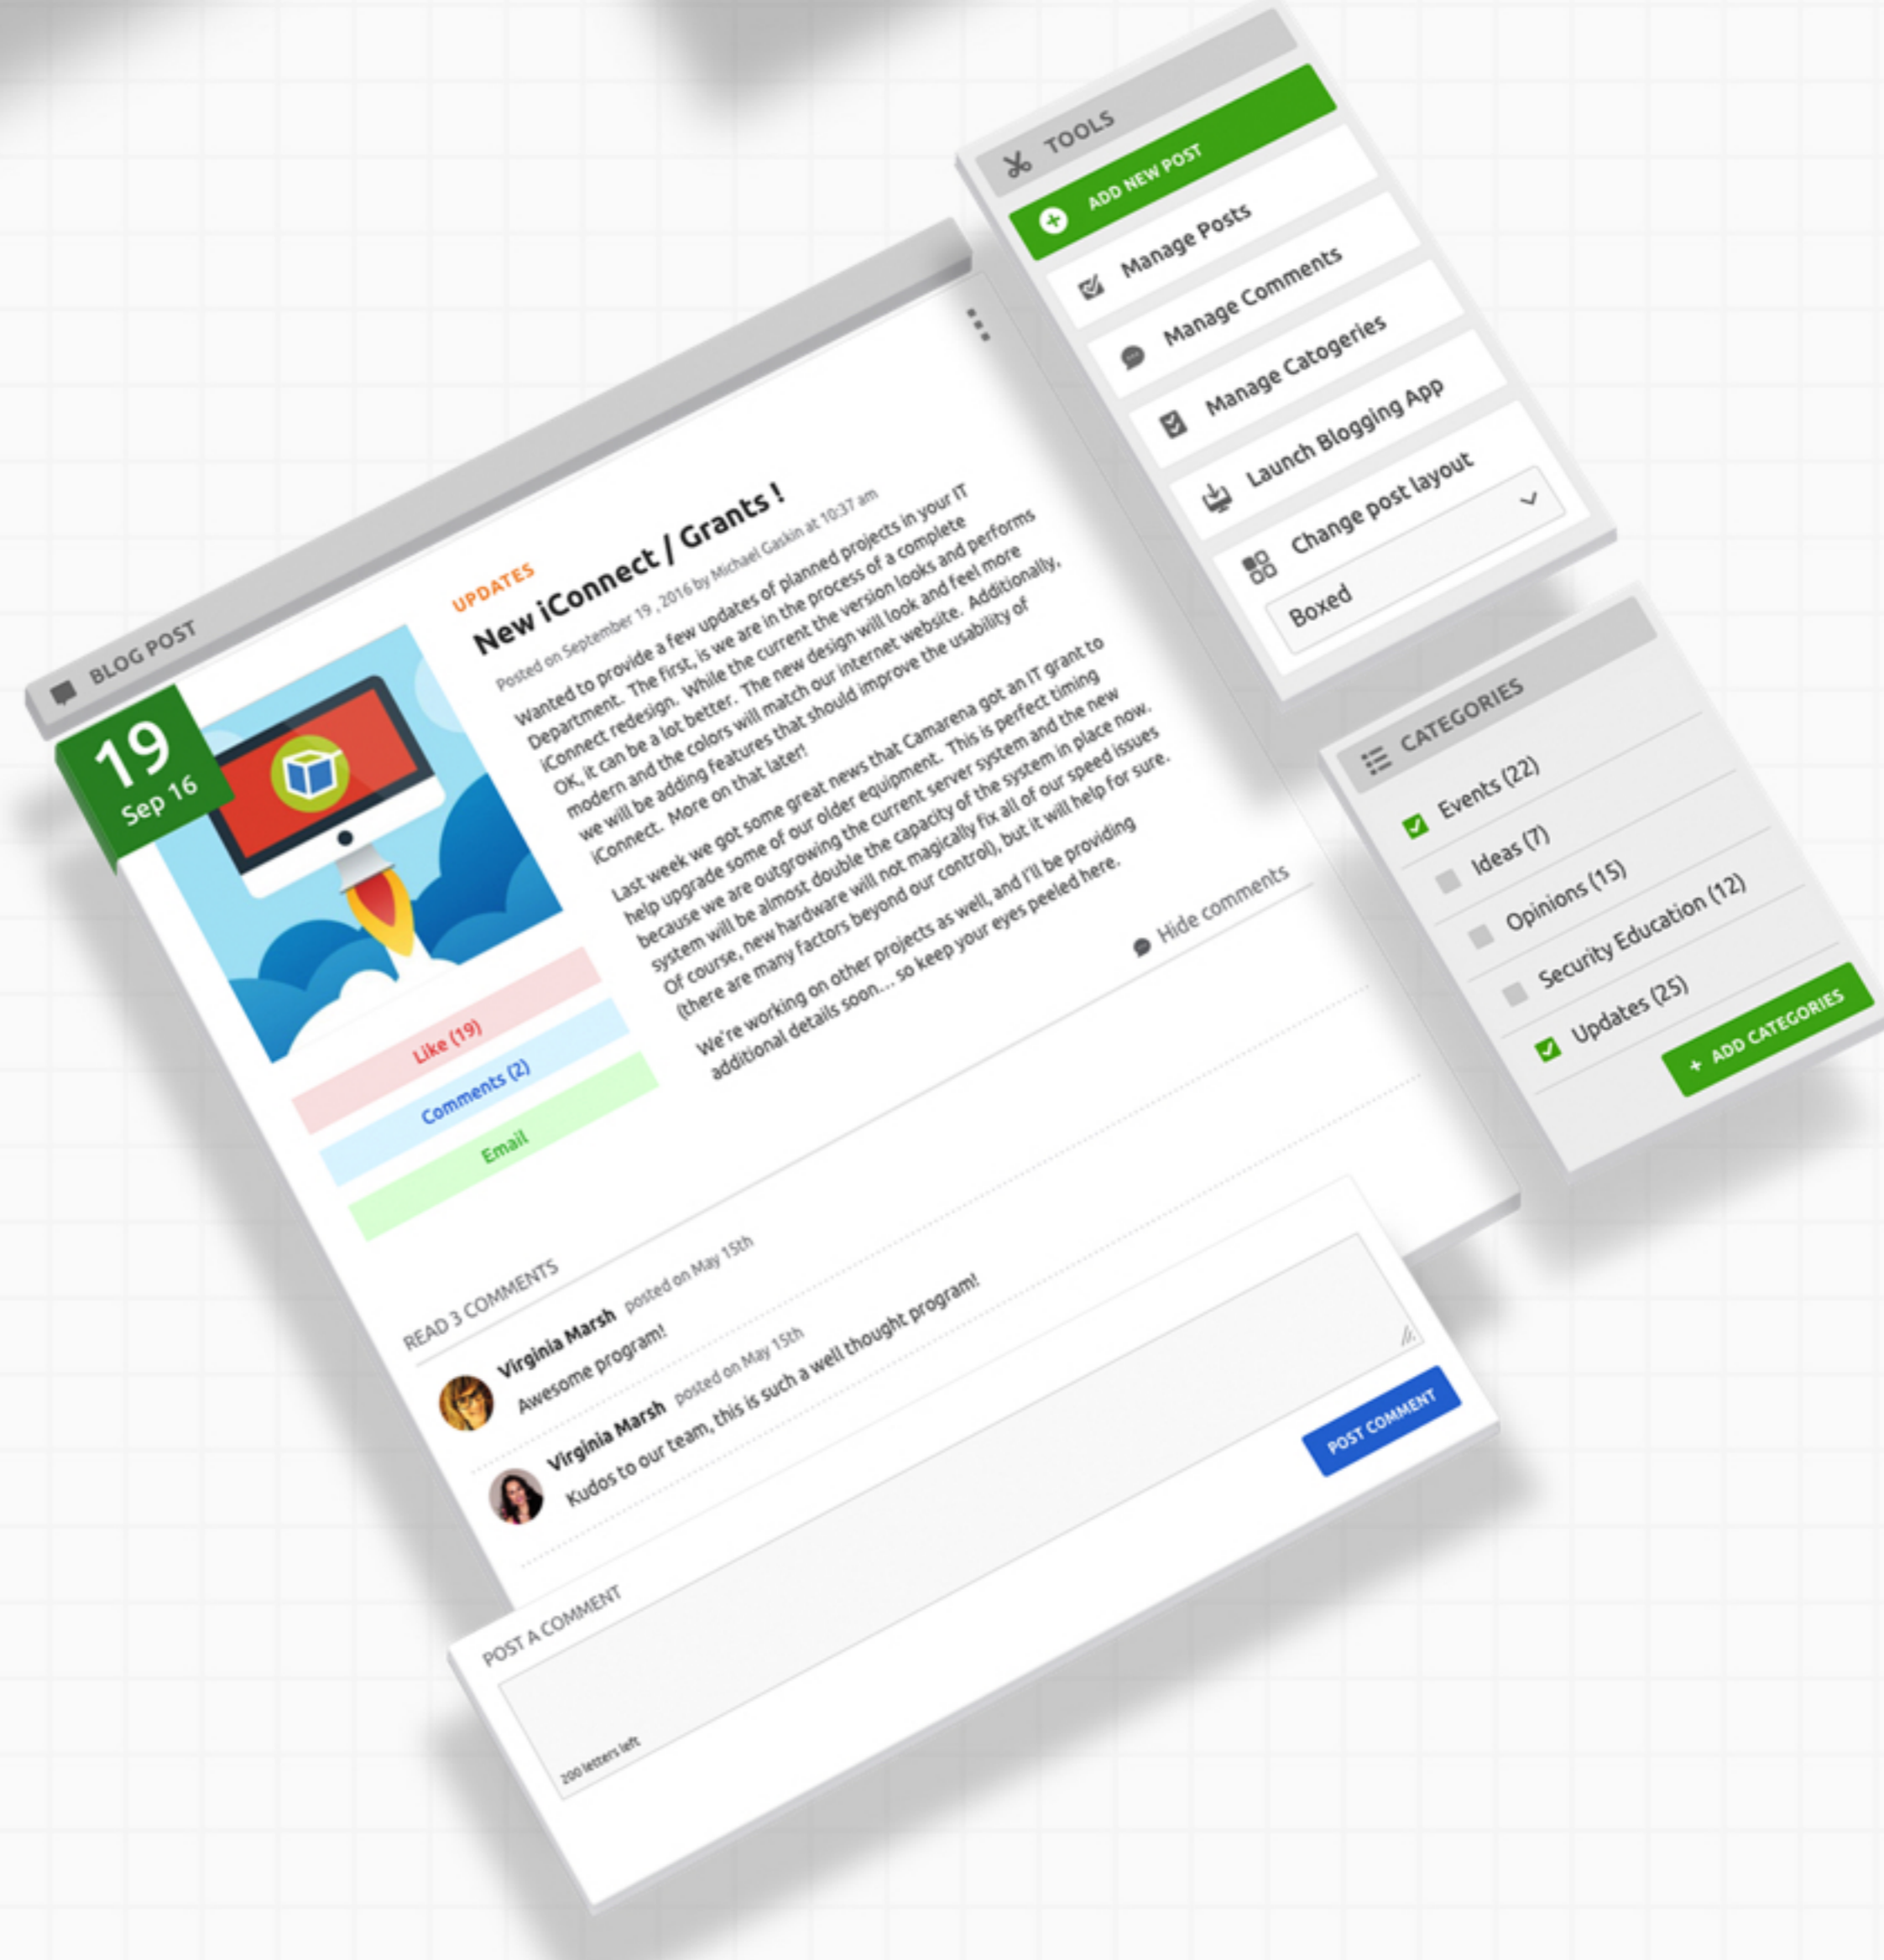

DYNAMIC MULTI-SITE
WIDGETS

We implemented a dynamic navigation that contains many interesting UI elements to nest secondary and ancillary functionalities. Dropdowns contain access to sub-navigation elements, custom content widgets offer supplemental information and a suggestion box allows for user submission of system feedback.

users informedADVANCED UI/UX
DESIGN

With numerous data collection points and advanced functionality requirements, NIFTIT strived to design a fluid and logical user workflow.

Many layers of nested functionality required much reiteration during the storyboarding phase. The end result is a clean and consistent virtual space for users to monitor progress, submissions and validation.

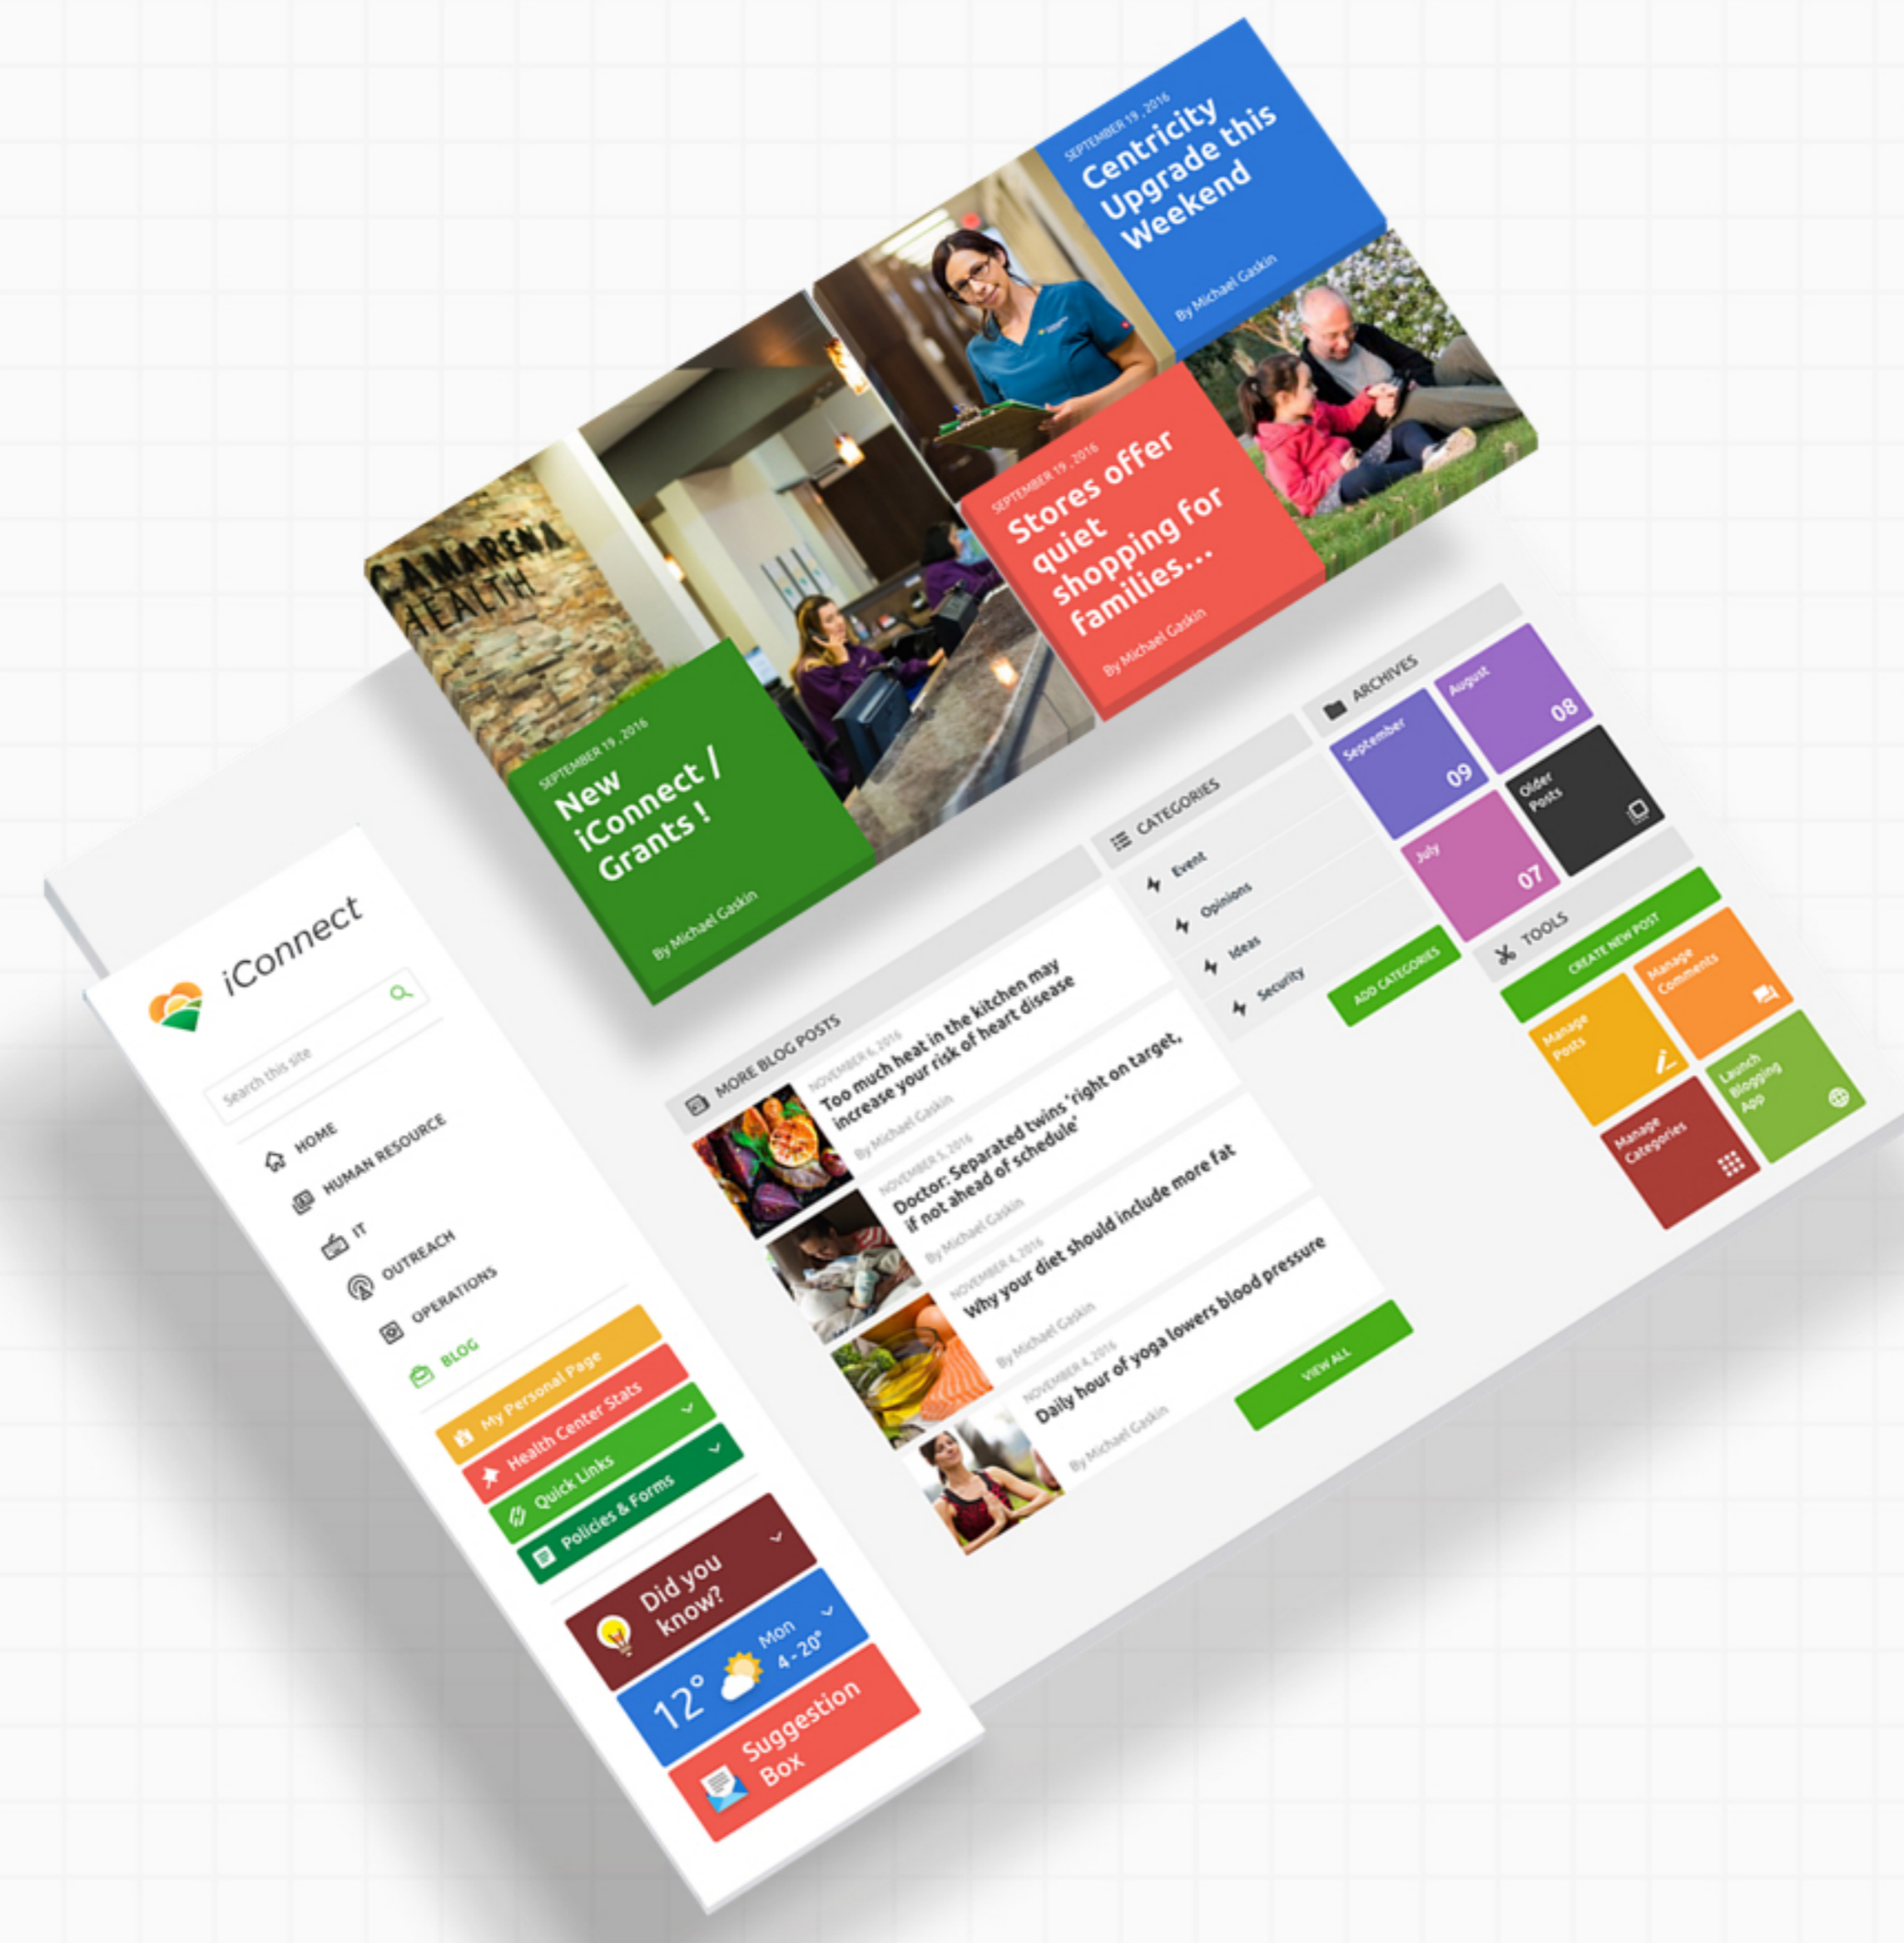

CONSISTENT VISUAL LANGUAGE

With the requirement of designing hundreds of pages across dozens of systems, it was important that we established a consistent design language to fit all cases. Our solution was to create a branded UI styleguide document and developer reference platform.

BESPOKE MARKETPLACE PORTAL

We collaborated with the client to offer a dynamic marketplace for users to upload, edit and manage listings of secondhand items to sell.

METRO STYLE BLOG
PAGES

With design consistency in mind, the NIFTIT team developed a Metro Style blogging site with styles that are aligned with their SharePoint site branding guidelines. As the goal of the site is to create a better and more efficient blogging experience within SharePoint, the newly designed site features a more engaging and interactive experience for users. Toolbars were added to ease access for users to create blog entries, manage categories and regulate public comments on the site.
